- ARTICLE – Selection of common cashew tree genotypes in commercial growing areas in municipalities of Piauí, Brazil
- ARTICLE – Heritability of morpho-agronomic traits in ornamental pepper
- ARTICLE – The morphological study and gene expression analysis in citrus hybrid with a short juvenile period
- ARTICLE – Selection of conilon coffee clones tolerant to pests and diseases in Minas Gerais
- ARTICLE – Pure line selection in a heterogeneous soybean cultivar
- ARTICLE – Genotyping and molecular analysis of transgenic sequences in chrysanthemum (*Chrysanthemum X morifolium* Ramat)
- ARTICLE – Evaluating early selection in perennial tropical forages
- ARTICLE – Changes in leaf appearance and developmental phases associated with breeding progress in six-rowed barley in the Pannonian Plain
- ARTICLE – Genotype x environment interaction analysis of multi-environment wheat trials in India using AMMI and GGE biplot models
- ARTICLE – Genetic progress of the peach breeding program of Embrapa over 16 years
- ARTICLE – Assessing genetic diversity and population structure in a *Dipteryx alata* germplasm collection utilizing microsatellite markers
- ARTICLE – Genetic variability revealed by microsatellite markers in a germplasm collection of *Jatropha curcas* L. in Brazil: an important plant for biofuels
- PLANT BREEDING PROGRAM – A brief history of the forty-five years of the Epagri apple breeding program in Brazil
- CULTIVAR RELEASE – IAC Catuaí SH3 – a dwarf Arabica coffee cultivar with leaf rust resistance and drought tolerance
- CULTIVAR RELEASE – INT7100 IPRO – A soybean cultivar for an extensive growing area in the South and Cerrado in Brazil
- CULTIVAR RELEASE – Primary hybrid of *cattleya forbesii* x *cattleya loddigesii*, a new brazilian orchid
- CULTIVAR RELEASE – BRS Catiana: irrigated rice cultivar with high yield potential and wide adaptation
