- ARTICLE – Callus induction and pro-embryogenic mass formation in *Myrciaria dubia*, an important medicinal and nutritional plant
- ARTICLE – Potential of dry matter yield from alfalfa germplasm in composing base populations
- ARTICLE – Identification of transgene flanking sequences in a pre-market safety assessed sugarcane in Argentina
- CULTIVAR RELEASE – SCS125: new paddy rice cultivar
- CULTIVAR RELEASE – BRS Sarandi: a new *Andropogon gayanus* cultivar for tropical pastures
- CULTIVAR RELEASE – ‘Đ9’, a high-yielding and early maturing soybean cultivar resistant to soybean rust isolates from Vietnam
- ARTICLE – Genetic parameters and path analysis for root yield of cassava under drought and early harvest
- ARTICLE – Pollen morphological analysis of papaya (*Carica papaya* L.)
- ARTICLE – Genomic affinity in hybrids of B-genome *Arachis* species: new genetic resources toward peanut improvement
- CULTIVAR RELEASE – BRS Tainá: new white seedless grape cultivar for the Brazilian semi-arid region
