- ARTICLE – Genomics of grain quality in cereals
- ARTICLE – Technical nuances of machine learning: implementation and validation of supervised methods for genomic prediction in plant breeding
- ARTICLE – Plant breeding in Brazil: Retrospective of the past 50 years
- ARTICLE – Germplasm enhancement and cultivar development: The need for sustainable breeding
- ARTICLE – Biometry in plant breeding
- ARTICLE – The use of high-throughput phenotyping in genomic selection context
- ARTICLE – Recurrent selection in papaya: An effective strategy for the continuous development of new cultivars
- ARTICLE – Contribution of breeding to agriculture in the Brazilian Amazon. I. Açaí palm and oil palm
- ARTICLE – Rice blast: strategies and challenges for improving genetic resistance
- ARTICLE – The numbers game of soybean breeding in the United States
- ARTICLE – Spray-induced gene silencing: an innovative strategy for plant trait improvement and disease control
- ARTICLE – Enviromics: bridging different sources of data, building one framework
- ARTICLE – Next generation breeding in pulses: Present status and future directions
- ARTICLE – Genomic selection with rapid cycling: Current insights and future prospects
- ARTICLE – Implementation of genomic selection in public-sector plant breeding programs: Current status and opportunities
- ARTICLE – How to write and publish articles in plant breeding: What do we need to know?
