cbab.sbmp.org.br

- Table of contents
- ARTICLE – Modeling spatial trends and selecting tropical wheat genotypes in multi-environment trials
- ARTICLE – Flooding tolerance of sugarcane genotypes under recurring floods in plant and ratoon crops
- ARTICLE – Development and characterization of elite doubled haploid lines of ornamental kale
- ARTICLE – Exploration of allelic diversity reveals a novel FAD2 (Oleate desaturase) gene in *Brassica juncea*
- CULTIVAR RELEASE – BRS Boitatá and BRS Ocaúçu: cassava cultivars for the industry
- ARTICLE – Optimization of the assessment of anthracnose severity in artificially inoculated common beans
- ARTICLE – Chemical composition and antiprotozoal potential of essential oil from half-sib progenies of *Varronia curassavica* Jacq.
- NOTE – First Latin American off-patent corn event – Fenaltec 22
- ARTICLE – Genetic parameters and selection for multiple traits in sorghum for forage purposes
- ARTICLE – Genetic parameters and selection index in intraspecific cotton lines in a Brazilian semi-arid region
- ARTICLE – Analysis of allelic variation of TaNCED1-5B and functional marker development for drought resistance in wheat
- ARTICLE – A new set of quantitative trait loci linked to lipid content in *Coffea arabica*
